## PROFESSIONAL SUMMARY

Junior Web developer, experienced both Front-end and aswell Back-end technologies.

My most recent work can be found in the Projects section below or for more you can visit my Github page.

When I'm done with work on projects, I'm studying as there's always something new to learn about the web. Getting an opportunity working with new technology I haven't used wouldn't be a chore for but rather entertaining relaxation.

## Salvaged. London - Freelance Web developer

### IN PRODUCTION

October 2020 - Present

Full-stack E-commerce web app. With database, user authorisations, authentications.  
Built on EmberJS, PostgreSQL, TailwindCSS, Node/Adonis.

## Bg-design, London - Freelance Web developer

### [bg-design.herokuapp.com](https://bg-design.herokuapp.com)

April 2020 - August 2020

Built static website for Interior designers showroom "gallery" with given design requirements.

Used HTML5, CSS3, Node/Express for server and Routes. Implemented 2 plugins with JQuery, Carousel for swiping menu and Lightroom for gallery.

## Lanka, London - Freelance Web developer

### [lankagg.herokuapp.com](https://lankagg.herokuapp.com)

January 2020 - June 2020

Designed and built full-stack web app with MEN stack (MongoDB, Expres, Node) where gamers can arrange gaming session, comment games.
