PROFESSIONAL SUMMARY

Javascript Developer, experienced both Front-end and aswell Back-end technologies. I specialised in Front end and using Front-end Frameworks and libraries like EmberJS or ReactJS

My most recent work can be found below or for more you can visit my Github page I have pinned the most recent project on the first page.

When I'm done with work on projects, I'm studying as there's always something new to learn about the web. Getting an opportunity working with new technology I haven't used before wouldn't be a chore rather new level to achieve.

Bg Designs., London - Frontend developer
January 2021 - January 2021

Client needed to redo old website and use new technologies. I took over and rebuilt it from scratch. Mobile first approach and responsive
- Ember.js
